

MEHMET HANIFI GUMUS

WEB DEVELOPER

SUMMARY

After graduating from the Computer Programming department, I began my career at Misafir Geliyor A.Ş. as a Front-End Developer and gradually expanded my skills in areas such as Back-End coding, Database management, and Server administration. Later, at O2Bilişim Çözümleri A.Ş., I enhanced my knowledge and experience by working on e-Transformation packages in the SAP domain. With a focus on ASP.NET and database management, I achieved significant success in a short period. While working as a Full Stack Web Developer at Misafir Geliyor A.Ş., my accomplishments led to an offer from O2 Bilişim Çözümleri A.Ş. to work in the SAP field, where I continued to develop myself. I hold certifications in areas such as HTML5-CSS3, API, API Testing, and Bootstrap. My experience in project management and teamwork has allowed me to contribute to projects in various cities.

WORK EXPERIENCE

FULL STACK WEB DEVELOPER

Misafir Geliyor A.Ş. | APR 2022 - NOV 2023

- During my internship as a Front-End Developer at this company, I quickly advanced my skills in ASP.NET and transitioned to writing Back-End code. This period provided ample opportunities to work closely with databases, allowing me to enhance my proficiency in database management as well.

SAP TECHNICAL CONSULTANT

O2 Information Technology Solitions | NOV2022 - STILL ONGOING

- I gained expertise in e-Transformation processes within SAP and worked in various areas such as Module tasks, Basic operations, ABAP coding in line with the needs. I also took an active role in project management and processes by traveling to different cities. Through these experiences, I gained valuable teamwork skills by collaborating with different colleagues in different workplaces.

PROJECT

Web Application Solving Intense Traffic and Parking Issues

This project involves the development of a web application aimed at addressing the intense traffic and resulting parking issues in Istanbul. Utilizing location data from users' web browsers, the application displays nearby parking locations and provides directions when necessary.

The project includes features such as the opening-closing hours of parking facilities, pricing information, location details, and the identification of available parking spaces. Additionally, the application includes the locations of gas stations, charging stations, spare parts shops, and similar facilities.

This project has allowed me to enhance my skills in web application development, location-based services, and database management. It has also strengthened my abilities to develop user-centric solutions and tackle complex problems.
